PUBLIC HEARING OF THE BRITISH COLUMBIA ENERGY COMMISSION

THE British Columbia Energy Commission will hold a public hearing for the purposes of an annual review of the following matters:

1. Present levels of exploration and development in the petroleum and natural gas industry within the Province.

2. Present and future field prices for petroleum, natural gas liquids, and natural gas in the Province, and whether such prices represent fair compensation and constitute adequate incentive for exploration and development within the Province.

3. Quantities of proven and probable reserves of natural gas, crude oil, and other petroleum products in British Columbia, and expected future production levels from these reserves having regard to probable connection schedules and alternative contractual arrangements for sale of natural gas.

4. The importance of natural gas "deliverability" type contracts as an incentive to explore in British Columbia, and the probable impacts of such contracts on the long-term availability of natural gas in the Province.

5. (a) The extent to which economic considerations are a factor in achieving maximum oil recovery from existing water floods in the Province without resorting to tertiary recovery techniques.

(b) The advisability and the form of any incentives required to encourage the investigation and implementation of recovery schemes in the Province for increasing oil recovery beyond that technically possible by water flooding.

6. Transmission company and distributor estimates of the probable future requirements for natural gas in the markets served for a period of 25 years assuming that the cost of refinery crude oil rises to \$14/barrel (1977 dollars), by 1980 and remains constant in real terms, and that natural gas at the city gate is priced at 85 per cent of the cost of refinery crude

oil. Explicit consideration should be given to the following:

- (a) New residential/commercial building codes;
 - (b) Upgrading existing housing stock;
 - (c) Energy conservation in industry;
 - (d) Conversions either to or from natural gas;
 - (e) Availability of hog fuel and (or) coal at competitive prices.
7. Utilization of underground storage to improve efficiency of gas transmission and distribution in the Province.
8. Appropriate criteria for evaluating export sales, including
- (a) minimum reserve life indices;
 - (b) protection formulae (e.g., 30A1, 25A4, etc.);
 - (c) options for termination or extension of export licences.

The matters to be addressed by the Commission having been expanded beyond those covered in the hearings of 1975 and 1976, which were primarily related to oil and gas exploration, production, and pricing. The Commission invites interested parties, and in particular, distribution companies, consumer and industry groups, to make submissions on any or all of the matters to be addressed.

The hearing will commence at 10 a.m., June 20, 1977, in the Hearing Room of the Commission on the 21st Floor, 1177 West Hastings Street, Vancouver. Submissions by interested parties should be filed in 10 copies with the Secretary of the Commission not later than June 6, 1977, to British Columbia Energy Commission, 21st Floor, 1177 West Hastings Street, Vancouver, B.C.
